

CAPABILITIES STATEMENT

Hestum Tech Solutions Provides Expertise and Talent to Keep Organizations Moving Forward

OVERVIEW

Hestum Tech Solutions is a tribally owned Joint Venture between Redding Rancheria Economic Development Corporation (RREDC) and KR3 Information Systems, Inc (KR3). Formed to expand economic opportunity and bring forward the strengths of a Native-led enterprise, Hestum pairs KR3's proven record delivering secure, scalable IT solutions with the cultural values, purpose, and community-centered perspective of Redding Rancheria. Together, we provide services across Identity, Credential, and Access Management (ICAM); cybersecurity, cloud engineering and migration; enterprise IT modernization; and skilled IT staffing.

Hestum offers agencies a mission-aligned partner with the agility to support rapidly evolving needs, while maintaining a strong foundation of trust, integrity, and technical excellence.

Core competencies include:

- IT and Health Informatics
- Data Analytics and Emerging Technologies
- ICAM (Identity, Credentialing, And Access Management) Services
- Application Development and Modernization
- Continuous Diagnostics and Mitigation (CDM)
- Data Center Management & Application Hosting
- Cloud Services
- Staff Augmentation

Indian Incentive Program (IIP) Eligible:

Prime contractors who subcontract to Hestum may be eligible to receive a 5% rebate of the subcontract value under the Indian Incentive Program (FAR 26.1 / DFARS 252.226-7001).

- 611420 - Computer Training

SOLE SOURCE ADVANTAGE

Hestum Tech Solutions is positioned for Tribal 8(a) participation and can finalize certification as part of the award process. This allows agencies to work with us through a simplified and flexible sole source acquisition pathway that offers significant advantages:

- Expedited Procurement
- Reduced Paperwork
- Direct Negotiation
- Supports Tribal Economic Development
- Simplified Acquisition

TEAM PAST PERFORMANCE

Trusted Talent and Steady Support, Delivering Reliable and High-Quality Program Outcomes.

OVERVIEW

Hestum provides individualized attention to each of its client's needs and deploys the utmost quality through the right resources at the right time and for the right cost. The following performance reflects work successfully delivered by KR3 and Hestum team members.

Centers for Disease Control and Prevention (CDC):

- Implemented, and currently maintains, enhances, and operates CDC's ICAM solution for external partners called SAMS (Secure Access Management Services), working with 400+ applications
- Migrating SAMS systems utilizing a cloud-based Identity-as-a-service (IDaaS) FedRamp High platform
- Zero Trust, NIST, and CDC/HHS security policies implementation
- Participation in CDC DMI strategy and architecture activities, Agile Software Development Support

Booz Allen Hamilton

- Provided support for CDM (Continuous Diagnostics and Mitigation), ZeroTrust implementation and Application Modernization with Cloud Migration, solution testing, integration, O&M, governance, training, asset tracking, security authorization, and incident response
- Under the OCIO Technical Applications Support Services (OTAS) contract, Delivered support including agile DevSecOps, software development, system deployment, operations and maintenance, and enterprise data capabilities through teams aligned with CDC OCIO's IT priorities
- Provided data analytics, forecasting, and visualization support for the CDC's EDAV platform and CDC's Data Modernization Initiative (DMI)

NTT DATA/CDC:

- IT Services support services including OCIO/ISB application hosting, Enterprise file and Data center management specific level support for health care applications (~800 applications) across the CDC

Peraton/CDC:

- Providing support to the CDC for Electronic Integrated Disease Surveillance System (EIDSS) & Pathogen Asset Control System (PACS) software development, software maintenance, requirements management, and training development.
- Supported mission-critical COVID-19 applications

Equifax:

- Providing managed services for NetSecOps, enterprise and customer-facing IAM systems, and Cloud IAM environments
- Designed, implemented, and operating a FedRAMP-authorized authentication and authorization gateway
- Deployed an enterprise ICAM solution for both B2C platforms and government-facing applications
- Integrated identity verification and Privileged Access Management (PAM)
- Supporting application transitions using SAML 2.0, WS-Fed, Radius, and OIDC
- Delivering ongoing operations support, including maintenance, patching, and Helpdesk services

Tech Mahindra / AT&T (Cloud):

- Migrating 2000+ on-prem systems to Azure/AWS Cloud.
- Applications with a variety of technologies including Custom Apps, COTS Products, Data Warehouse, and Enterprise Shared Services.

Genuine Parts Company (GPC):

- Support for operations, modernization, and implementation of GPC's ICAM and Identity Governance and Administration (IGA) systems
